

In today's hospitality industry, sustainability is more than just a trend; it is a necessity. CSN Card Services and PrintPlast lead the way by offering eco-friendly alternatives to traditional hotel key cards, made with materials like 100% wood, bamboo, recycled PVC, and PPH Bio.

A Joint Venture Rooted in Excellence

CSN Card Services and PrintPlast represent over 35 years of combined expertise in the production and supply of hotel key cards. This partnership unites two industry leaders with a shared mission: empowering hotels with reliable, innovative, and sustainable solutions tailored to their operational needs to thrive in a competitive and rapidly changing market.

Security and Quality You Can Trust

Security is a top priority in the hospitality sector, and our partnership ensures that every card we produce is designed to meet the highest standards. Whether your hotel uses RFID or magnetic stripe technology, we deliver key cards that are robust, secure, and fully compatible with your access systems.

Customization

Our customization options allow hotels to turn their key cards and wristbands into an extension of their brand, creating a memorable and seamless experience for guests from check-in to check-out.

Local support

By offering localized support through our offices in the Netherlands and Germany, we provide hotels across Europe with the confidence that they have a trusted partner just around the corner. This proximity, combined with our innovative approach to sustainability and security, sets us apart as the leading choice for hotel key card solutions in the region.

ECO-FRIENDLY RFID WRISTBANDS
